

# Aquatic milkweed

## *Asclepias perennis*

This aquatic species is found in cypress swamps, floodplain forests, marsh edges and wet ditches. With white to pink flowers that can appear from May – September you are sure to attract local butterfly species. Stems are a dark purplish-green and contrast nicely with the green leaves. Tolerates Sun to Part Sun

- Perennial
- Grows 18-24" upright
- Found in wet soils, floodplain forests
